2 transmittal – there's a transmittal e-mail. 3 So this appears to be at the point where that 4 transaction with – that initial transaction 5 with – between Think Finance and NCA is 6 beginning to happen, correct? 7 A. Yeah, it looks to me like an e-mail 8 chain of that representing somewhat 9 negotiations, I guess. 10 Q. Horrocks says – Horrocks says to 11 Hochstein that – it says, if you look on the 12 second page, the e-mail of November 18th, 13 2010, it says: Where are we on this and each 14 of the segments of the warehouse? What does 15 that mean? 16 A. Typically when a lender hasn't sold, 17 they're still charging off the accounts. And 18 if they're not placing them in an agency or 19 selling them, they call it a warehouse. They 20 just keep stacking up charged off debts and 21 the amounts just keep growing. The age of 22 them keeps getting older, et cetera. It's 23 just a generic term. 24 Q. I take it from these charts on the Page 90 1 exhibit, that the older the debt, the less 2 valuable price it gets in a purchass? 3 A. Correct. 4 Q. That seems to be common sense. Yeah. 5 Okay. Do you see up at the top, the last 6 e-mail is from Brad to Shawn with a cc to you 7 that says. Why don't you tell me what we're looking at. MR. DAUGHERTY: You're referring now to Exhibit-73? BY MR. ACKELSBERG: Q. Yes. A. It's a loan sale agreement. Q. Let me ask you this and try to move this along. Would I be correct in stating that	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	a portfolio from a new issuer, to first buy an initial set of loans before committing to a forward flow? A. That would be in the best interest of NCA or the debt buyer. It doesn't always get that luxury. A lot of times I know that Brad and even today we'll ask if we can start off with a short term flow or a sample purchase, et cetera, specifically if it's a product that we never purchased or a different product line, you know, just to understand and learn what the value might be based on it. Do you see it says, draft February 8th, 2012? Do you see that? A. Yes, I do. Q. Can you tell, looking at this document, who is doing the drafting, whether Brett was delivering a draft agreement or whether it would have come from Brad? MR. DAUGHERTY: Object to form. Counsel, I also have an objection that often there's questions about who it came from and things like that. It can be answered by producing or showing the witness the associated e-mail. Are you representing to me that this was a standalone document as it was produced, it was a child to an e-mail? MR. ACKELSBERG: I don't remember. I think it's standalone. We got many standalone agreements from NCA. It was hard reconstructing.

Page 18 Page 20 Gordon -- I don't think it was Jones. So they were on 1 and talk about them in a little bit greater details. 1 2 2 pretty much all the calls. It was mostly with them. 3 3 Q So can you help me come up with that list of When we actually talked to Think Finance, they weren't on 4 4 everything that you can remember that you were those calls. 5 5 responsible for or that you did at Plain Green. Q Okay. So you would have compliance calls with 6 6 just employees from Plain Green and FACR. A Okay. So of course the SOPs, the operating. 7 7 Q Those are standard operating procedures? A Uh-huh. 8 8 Q Without any outside individuals. A Procedures, yeah. So basically we were to 9 9 develop a manual with those for each -- for issues A Uh-huh. 10 10 that -- well, not issues, but I guess for how -- the Q Is that a yes? 11 11 procedure of how things were supposed to be done with the A Yes; sorry. 12 12 loans; how everything moved. We developed -- we started MR. GROGAN: Objection to form. 13 13 working on a flowchart for the tribal -- for the -- well Q (By Mr. Gatewood) You said you worked with the 14 not only the council but the board, the board of 14 tribal attorney Dan Belcourt. What types of issues would 15 15 directors, which was mostly made up of tribal council you work with him on? 16 16 members. A Contracts. He was to provide input on a lot of 17 Q Okay; and we'll come back to that. Let's just 17 the contracts with the different service providers, 18 18 try to get the list together now of everything that you Decision Science, Victory Park. There was a 19 19 did, and then we'll come back and ask more detailed number -- there were a number of different contracts that 20 questions. 20 we had that he provided input on and reviewed. A Okay. So yeah, the flowchart of how the loans 21 21 Q Did you rely on his expertise in helping review 22 22 worked, how the fund was to be, I guess, utilized for the contracts? 23 loans, how many days it took for the loans to go out and 23 A Yes. 24 come back, the payments. Gosh, forgive me. It's been a 24 Q What other lawyers did you work with from Plain 25 25 long time since I thought about some of this stuff. Oh, Green? Page 19 Page 21 1 1 what else did we do? A I can only remember him at the time for Plain 2 2 Q You worked on complaints? Green. 3 3 A Yeah, we did complaints. We had an account Q Did you work with Robin Kovash? 4 4 through the BBB that we could log into and see if there A I think -- I remember meeting with Robin. No, 5 were any new complaints. So we would address those as 5 that wasn't on a Plain Green issue, that was a different 6 they came. 6 tribal. But Robin -- and I know Robin. But he -- no, he 7 7 didn't work with -- while I was there, he didn't help us Also, there was another business that I worked 8 a lot on as well, FACR, First American Capital Resources, 8 with anything, to my knowledge, as far as where those --9 which was the tribe's lending business. So I was also 9 Q Okay; what about Leann Montes? 10 10 working on -- we were kind of mirroring. We figured if A She -- she did work on a few things with Dan. 11 we -- if we developed this stuff on the Think 11 She wasn't as involved though. She wasn't there every 12 12 Finance -- on the Plain Green side of it, then we could day or at every meeting. It was just kind of sporadic also use that on the FACR side of it too. So there was a 13 13 with Leann. 14 lot of back-and-forth. Worked with the tribal 14 Q What about Rick Eckman? 15 15 attorney -- or the Plain Green attorney, excuse me, who A Nope. Rick Eckman attended the OLA 16 16 was a tribal attorney as well. meeting -- or the NAFSA meeting; sorry. Native American 17 Q And who was that? 17 Financial Services Association; sorry. He attended those 18 A His name's Dan Belcourt. We had conference 18 meetings and would sit in on the smaller sessions with 19 calls almost every day that I participated in for 19 the tribe and with Think Finance. But I don't recall him 20 20 compliance. actually participating in our operations, contracts, 21 21 Q With just Plain Green employees? things like that. 22 22 A No. No, usually the FACR folks were on those Q Okay. So on the list of items that I have that 23 calls with us, Lee Broome or Gordon --23 you remember doing at Plain Green, I've got SOPs, 24 24 Q Is it Gordon Jones? payments, complaints, working with the tribal attorneys,

A I don't remember if it was Jones. Is it Jones?

25

Page 22 Page 24 1 else we can add to the list? 1 A Uh-huh, yes. 2 A The contracts. We'd all review the contracts, 2 Q What types of input would you provide? 3 do mark-ups on them, questions if we had them. Contract 3 A I guess just reading through things, like I 4 4 review. said, to check for accuracy of information. It 5 Q And that's contracts not just with Think 5 wasn't -- it wasn't a whole lot. Like I said, a lot of б 6 Finance but with all of Plain Green's vendors? it came that was already done and ready to go. I mean, 7 A The third-party service providers. 7 obviously they people knew what they were doing, so it 8 8 Q Did you have any responsibility for approvals wasn't like we really knew what we were supposed to be 9 of various items? 9 looking for. I felt it was more just a formality than, 10 10 A No, just input, not any kind of approvals for you know, to say that Well, somebody from the tribe 11 anything. Everything had to go through Billi Ann for 11 looked at it and said it was okay. 12 12 O But it's fair to say that when Think Finance 13 13 Q What about with respect to any responsibility would provide Plain Green with some information, that 14 for wire transfers? 14 before Plain Green would actually approve it, they would 15 15 A No, that was not my department. That was review it. 16 another person's responsibility to do the loans, the 16 Start over? 17 approvals and things of that such. 17 It's fair to say that when Think Finance 18 18 O Who was that? provided Plain Green with some type of information, it 19 19 A Neal Rosette, Junior. needed to be approved, that Plain Green would actually 20 Q He was responsible for actually approving the 20 review the information before approving it. 21 21 Plain Green loans? MR. GROGAN: Objection to form. 22 22 A No, not the Plain Green loans. He did the FACR THE WITNESS: I would say that is not 23 loans. I don't think -- he may have. I couldn't tell 23 accurate in the sense that we weren't approving -- there 24 you for certain if he was doing the Plain Green loans as 24 wasn't a time where we were ever going to say No, we're 25 well. 25 not approving this. That information came to us already Page 23 Page 25 1 1 Q But it was someone else other than yourself -packaged and ready to go. Basically, I felt like we were 2 2 A Yep. just looking at it and saying This looks good, because 3 3 that's what we were supposed to do. Q -- that was responsible for approving the Plain 4 4 Green loans. Q (By Mr. Gatewood) But as the compliance -- the 5 5 A Yes. I didn't have anything to do with the individual focused on compliance at Plain Green, you 6 daily approvals on loans or anything like that. 6 would not be comfortable approving something without 7 7 Q Did you have any responsibility for approving actually looking at it. 8 8 marketing campaigns? A Well, first of all, I didn't have any kind of a 9 A I wouldn't say approving, but I did have input. 9 compliance training as to what the work was actually 10 10 They would send me what they call, I believe, rollouts entailing. When we worked with Think Finance, who was 11 11 for each month. They would send them out to all of us already established in this industry, the thinking was 12 12 and we'd look through them and look at them. And if we that we were going to be taught these things. So when 13 13 see any typos or anything that didn't look accurate as somebody sends you something and says We need an 14 far as information-wise. Page 15 Page 13 work with you, too. 1 who was taking your deposition, and what the matter 1 2 2 MR. SCHEFF: Yeah, no, I understand. 3 A. Sure. I'll be a little fuzzy on the first 3 BY MR. ACKELSBERG: 4 two. They were quite -- quite a while ago. One was 4 Q. Did you review that transcript in preparing 5 just a civil matter where my house we built flooded. 5 for today? 6 6 So we sued the developer of the house and was A. I did -- I did read through it. 7 deposed as part of that. 7 O. You did read through it. Okay. Did you 8 Q. And that was a personal? 8 read through -- did you review any other documents 9 A. Personal, yeah. 9 before -- before today in preparing for the 10 Q. Okay. 10 deposition? A. And then probably about ten years ago, at A. Yes, I did. 11 11 12 Think Finance we had an employee was -- was pushing 12 Q. Can you tell me what documents you 13 back for wrongful termination. So I was deposed in 13 reviewed? 14 14 that matter. A. I read through a handful of board memos 1.5 15 Q. Okay. that were presented back in history and also some 16 A. And then in the fall of 2016, I was deposed 16 other documents that had been submitted as part of 17 by the CFBP. 17 due diligence for this -- this hearing. 18 Q. Okay. And that was regarding Think 18 Q. Were these documents that you selected or 19 19 Finance? that someone selected for you? 20 2.0 A. That was, yes. A. As part of the preparation, I met with 21 Q. Okay. And do you remember who at the CFPB 21 Mr. Scheff yesterday. He had some documents he 22 took your deposition? 22 Q. Okay. Well, I'm not -- I'm not asking you 2.3 A. There was -- there was two representatives. 23 24 One was Ben Vaughn, I believe, and I can't remember 24 anything about -- about anything that was 25 the other name. 25 communicated between you and your lawyer. I'm just Page 14 Page 16 1 Q. Okay. And did you have representation 1 really specifically focused on the documents. So 2 2 the documents were just documents that were reviewed there? 3 A. I did. 3 during the course of that meeting? A. Yes. 4 Q. And who represented you? 4 5 A. Rich Scheff, and David Herman was there 5 Q. Okay. Did you -- did you discuss your 6 6 with me, and then Sarah Cutrona, my personal deposition today with anyone other than counsel? 7 attorney as well. 7 A. No, I did not. 8 Q. Okay. And did you or your attorney receive 8 Q. Now, because you've been deposed before, 9 9 a copy of the transcript of the CFPB deposition? I assume you know the ropes, like, what we're doing 10 10 here, but just for clarity in the record, I do want 11 11 Q. Okay. And you still have that, you or your to just confirm with you your understanding of 12 attorneys still have that? 12 what's happening here today. 13 A. Yes, we do. 13 You understand that this -- that we're MR. ACKELSBERG: Okay. Obviously, we 14 14 proceeding with questions and answers, both my 15 15 question, your answers and any objections or would like a copy. MR. SCHEFF: I don't know that I'm 16 comments of counsel will be transcribed into a 16 17 permitted -- first of all, we didn't -- we weren't 17 transcript like the one that you apparently --18 provided one by the CFPB. And I don't know -- we 18 apparently was done after the CFPB deposition. Do 19 19 you understand that? have to check the regulations as to whether or not 20 we're permitted to disclose it. If we are, 20 A. I do. 21 obviously, we'll share it with you. And if not, 21 Q. Okay. And that transcript could be used by 22 there may be a procedure to get permission to do 22 a party in this case --23 that. I just don't know, but I'm happy to look into 23 A. Okay. 24 24 Q. -- in further proceedings? You understand 25 that. Okay. And you also understand that you're MR. ACKELSBERG: Okay. And we can 25

Q. Okay. Now, we're also -- I don't know if the -- if in the previous depositions you had a videotape going, but we do have a videotape, as you're aware. And I just want to make it clear to you that the official transcript will be what the court reporter -- the official record will be the transcript that the court reporter will prepare. So, therefore, nonverbals aren't picked up on the transcript. You have to -- you know, a nod of the head isn't going to work. It will have to be "yes." Or a shaken head doesn't work. We need a -- we need an affirmative "no."

So the other thing I want to make clear to you is that if you don't understand the question, just make -- just say that, and I'll try to rephrase it.

20 A. Okay.

> Q. Your lawyer may object to a question. I'm sure he will. Other lawyers may have something to say also. But it's important for you to understand that even -- even if there is an objection, unless your lawyer directs you not to answer that question,

Page 19

- A. Currently, I'm the chief operating officer of Elevate Credit.
- Q. Of Elevate Credit. Okay. And Elevate was formed -- when did Elevate first start operations?
 - A. Elevate began operations in May of 2014.
 - Q. And what position did -- and you went to Elevate in the beginning, correct?
 - A. That's correct.
- 10 Q. And you held what position?
- 11 A. I was chief operating officer there as 12 well.
- 13 Q. Okay. And at the time, just prior to 14 moving to Elevate, you had a position at Think 15 Finance, correct?
 - A. That's correct.
 - Q. And what was the position there?
 - A. I was -- I went through a handful of positions. I believe my last position there was chief -- chief product officer. It was right around that same time that I was promoted to chief operating officer. So it's one of those two -- two roles there.
 - Q. Okay. And as chief product officer, what were your responsibilities at Think Finance?

Page 18

- you still have to answer it. Okay?
 - A. Understand.
 - Q. So the way it will -- in that case, you know, I'll ask the question, there will be an objection, we'll wait until the objection is over, and then you -- and then you respond with your answer. Okay? Is that understood?
 - A. Understood.
 - Q. Great. We will take breaks. This isn't an endurance course. If you need a break, let us know. We'll just ask you to finish the -- your answer to the pending question, and then we'll go off the record. We will take periodic breaks. So, again, let us know if you need a break. But I assure you that this -- we're not going to be just going all through until lunch. There will be at least one break before lunch.

And, finally, is there any reason, such as illness, hearing disorder, medication, lack of sleep, why you can't give this deposition your full attention this morning?

- A. No, there's not.
- Q. Okay. Great. So let's start with your position that you currently have, your employment position.

Page 20

- A. Sure. So I had three different groups that reported to me, one being our operations team that managed the customer service and call centers for the products within Elevate, and then also the product --
 - Q. With Elevate or Think Finance?
- 7 A. I'm sorry, with Think Finance. It's been a 8 while.

And then also I had two different product teams reporting to me. One was around installment lending products, and some were around the single pay or direct lending products.

- Q. So the -- the two -- so there also was a line of credit product, right?
- A. Right, there was a line of credit product that was -- that there was the third piece of that, too, as well. I'm sorry.
- Q. So you had the operations team working on call centers and collections, right?
 - A. I didn't have the collections at that time.
- Q. Okay. I thought -- I thought you said collect- -- I'm sorry.
 - A. I'm sorry, it was customer service. The operations was specific to the customer service piece. The collections piece was within our risk

person who's referring the loan over. And if you read back in -- in Attachment 2, what we were

3 talking about is being a marketer to provide leads

4 to a website, not an individual. And the website

5 was licensed by the bank, and the bank would do the 6

automated decision, an automated process because there's no specific person referring the leads over.

O. Okay. And what does that mean?

A. To me, what an automated decision is, is there's -- and just in general terms, there's preset variables that go into making some -- some --

MR. SCHEFF: Go ahead and finish the question, and then I'll make a comment.

A. -- to making some sort of decision. It could -- and it could be anything from lending rules to triggers for marketing initiatives. But it's just taking a set of rules, automating that there's no human involved in that process, and then coming up with a decision and -- and the outcome that comes

Page 39 BY MR. ACKELSBERG:

Q. So when -- when you were referring to a decision in describing an automated decision engine, am I right that we're talking about a decision whether to approve a loan or deny a loan

application? Is that what we're talking about? MR. GATEWOOD: Objection; form.

A. So as I said, actually, a decision engine could be used for multiple purposes. One purpose could be for an approval on a loan. It also could be for different account management functions. It could be for variables that come in on customer interactions, if you want to send out customer communications. So it can be -- it can be leveraged in multiple different ways.

BY MR. ACKELSBERG:

Q. But that's in -- I see. You're saying what an automated decision engine could be in other context. But I'm talking about the context here, meant that the role of broker was that -- the role of broker that was being played by Think Finance with regard to the ThinkCash product was its automated decision engine for deciding on whether to approve a loan application. That's what we're talking about, right?

out with the variables.

BY MR. ACKELSBERG:

Q. And when you say "a decision" --

MR. SCHEFF: Before -- before you ask a question, I want to note for the record that Exhibit 101 starts with PAOAG 0000207, and it ends at PAOAG 0000247, but numbers PAOAG 0000219 through

243 are missing from this document. So this is an 9 incomplete document, again, that you're asking this witness about. 10

So, again, Mr. Ackelsberg, you must mark complete documents in fairness to the witness. We're -- we can't have depositions where witnesses see pieces of exhibits. It's just not fair.

You can ask your next question.

16 MR. HERMAN: For the record, I would 17 also like to note, Mr. Ackelsberg, I'm not sure this 18 is the correct Bates number from the latest 19 Pennsylvania production. This may have been from an 2.0 earlier production which was superseded by the 21 Commonwealth. The current Bates number page I have 22 for 207 is an article that you have referenced, and

23 this is PAOAG 0001940. 24 MR. ACKELSBERG: 1940. Okay. Thank

you.

BY MR. ACKELSBERG:

Q. And the site was your site, right?

MR. SCHEFF: Were you done -- were you done with your answer before Mr. Ackelsberg asked the next question?

THE WITNESS: I am done now. MR. SCHEFF: All right. Go ahead. BY MR. ACKELSBERG:

O. And the site was the ThinkCash site, correct?

A. Well, the site was licensed to First Bank of Delaware. So they had a license agreement to -to take ownership of that site.

Q. Of the ThinkCash decision engine, correct? MR. SCHEFF: Object to the form. You can answer the question if you can.

A. So the decision engine was created by Think

A. So, I mean, I think if you -- if you look on slide 8, that -- you know, what we decided was -and this was a very early on presentation, but we do state -- to do installment lending license on a state-by-state basis.

- Q. And the last thing mentioned, "Optimize ThinkCash migration and enterprise value," what did that mean?
 - A. So that there was -- there was a portfolio there within ThinkCash, and the question was do we let that liquidate down or do you find through working with a bank, are there other products that can be offered to those consumers that were interested in the lending products.
 - Q. So we're talking there about the -- in part, about the customer base of ThinkCash, right?

A. Yes.

Q. Because the way the product works was a lot of your new loan -- a lot of your -- your new originations would come from existing customers, right, returning customers?

MR. GATEWOOD: Objection; form. MR. SCHEFF: Object to the form.

A. So I'd say there was a good -- for the -- for the ThinkCash -- for the bank, the lender there, there was a good split between new customer traffic and returning customer traffic for them.

needed to explore multiple different offers. We just lost two partners that generate somewhere between 70, 80 percent of the revenue for the business. And so we started to expand and look out for other opportunities.

And I think if you look in the 2011 -- actually, at the end of 2010, we actually purchased a UK business to help move down that vertical. We launched two products, one being a prepaid card product called Spendable, a rent-to-own product called Presta, and then we also started exploring and going down the path of the tribal products as well.

BY MR. ACKELSBERG:

- Q. If you go to page 7 of the -- of the dec, it's talking about the core business, right? And so state-based ThinkCash was the -- was that pursued?
- A. So this is where we were looking at state license installment lending, where that could be applicable.
- Q. I mean, that, ultimately, is what you did with RISE, right?

A. So if you look at the first two there -sorry. If you look at what we had with RISE, that's correct, we -- we ended up getting RISE licensed to Page 92

Q. And what part of what your -- what you didn't want to do was lose those -- the potential for those customers to return for another loan, right?

MR. SCHEFF: Object to the form.

A. The way I recall the -- the contracts being set up is the marketing entity, TailWind, had the -- had the right to continue to market to those accounts even if the relationship with the bank terminated. So we were trying to find a way how to best market to those consumers.

Q. Now, am I right that within -- within weeks of the discussions in October of 2010, the company had developed a tribal product -- a concept of a tribal product named Great Plains?

MR. GATEWOOD: Objection; form.

A. So I wouldn't characterize it within weeks.
As I mentioned before, we were looking at, you know, various different initiatives, and -- and I believe

Page 111 Page 109 1 BY MR. ACKELSBERG: 1 Q. Now, there -- if you look, you see there's 2 Q. So, basically -- and that's because in 2 "Great Plains Customer Support," and there's a phone 3 designing the Think -- in designing the Great Plains 3 number there, right? And then to the right of that, 4 4 there's another entity mentioned, GPL Servicing, product, the idea was to try to -- to continue as 5 5 much as possible what -- what the company -- the LLC, Customer Support, in Wilmington, Delaware. Do 6 6 model that had been used with the bank? you see that? 7 7 MR. SCHEFF: Object to the form. A. I do. 8 8 MR. GATEWOOD: Objection; form. Q. Do you know what that reference is? 9 BY MR. ACKELSBERG: 9 A. So as I mentioned before, this is a draft 10 Q. With the First Bank of Delaware. 10 document on an intro presentation, so this -- this 11 A. So I would say, you know, over time we had 11 could have been a mock-up from an old program and we 12 developed a servicing platform, and who that lender 12 just tried to switch out some -- some of the 13 13 is could be a number of different parties. And so language and graphics just to give them an idea. So 14 we had done quite a bit of work building that out this could have been coming from anywhere. I don't 14 15 15 for a couple of our bank partners previously. And I 16 think it's prudent business practice to try to use 16 Q. Now, other than changing the name and the 17 that on a go-forward basis, if we could find another 17 graphics, how much of the infrastructure from 18 lender that was -- was agreeable to that product 18 ThinkCash were you able to use in creating the 19 19 tribal installment loan platforms? construct. MR. SCHEFF: Object to the form. 20 Q. Okay. Understood. 20 21 21 MR. GATEWOOD: Objection; form. And what -- would this have been -- what 22 22 team would be working on graphics like this that A. I mean, I think if you look at what Think 23 we're looking at? 23 had created, an installment loan platform is -- is 24 A. I can't remember if this was a slide that 24 fairly straightforward. So once it was created, it 25 somebody on my team put together or if Ken put it 25 could be duplicated and -- and reused, just like a Page 110 Page 112 together, but it would be one of ours working 1 Fisery, once they create their accrual system for 1 2 2 many banks to use was there. So we were able to, together on it. you know, work with -- with the first partner, and 3 Q. So either your team or Ken? 3 4 4 it actually ended up being Plain Green. But they A. Correct. were able to design what the product features and 5 5 Q. Now, if you'd -- if you'd turn back a few 6 6 pages. the look and feel. So we would have to make some UX 7 A. Which page? 7 changes and some pricing and loan structure changes, 8 Q. 13286. Now, this is a -- again, a mock-up 8 but the core mechanics of the system had already 9 9 of something a consumer might see in -- under this been built out. 10 Great Plains Lending model, right? That's what 10 MR. ACKELSBERG: Okay. All right. Let's look at the next dec. This is Exhibit 121. 11 we're looking at here? 11 12 A. So I remember this. This is, really, just 12 (Exhibit No. 121 marked.) 13 a draft of what could be done. I don't know if it 13 14 was actually put into production. 14 BY MR. ACKELSBERG: 15 Q. And what about the actual phone numbers, 15 Q. So when you -- you mentioned that --A. I'm sorry, can I just look at this real 16 the 877 phone numbers, where would that -- those 16 17 quick? numbers have been to? 17 18 18 O. Sure. Sure. A. I don't recall. 19 19 A. (Reviews document.) Q. It likely was somewhere in the Fort Worth 20 office? 20 21 MR. GATEWOOD: Objection; form. 21 Q. So the fist dec you'll see is titled "Great 22 MR. Page 117

- A. Yeah, my recollection was a slide titled like this was when we wanted to go talk to, you know, first-time potential partners to make the introduction.
- BY MR. ACKELSBERG:

for the tribes.

- Q. Okay. All right. And if you look at the second page, this is a slide that -- that you used with first-time partners?
 - A. Potentially, yes.
- Q. There's a -- there's a term called a "turnkey solution." I've seen that referenced in a number of documents. I mean, that was a term that you used in the -- in the sales presentations?

MR. GATEWOOD: Objection; form.

- A. Yes, it was in some of the decs.
- BY MR. ACKELSBERG:
 - Q. And in your own words, what -- what's a turnkey solution?
- A. To me, when we referenced turnkey, it was that we had the core of the system or platform created, and then working with the partner, we could customize it to their best fitting. But it was on -- I'll use the example again of, like, a Fiserv to where they have a turnkey solution for running banks with back-end operations that's there, ready

Page 119

Q. Well, I under--- I'm not really referring to some risk that may have -- may have been added to this -- to the relationship later on. I'm talking about early on, though. I mean, you were, in fact, representing early on that the tribe would have no risk of loss; am I right?

MR. GATEWOOD: Objection; form. MR. SCHEFF: Object to the form.

- A. As I just said, looking back on this, I don't know if that was the best set of words to use in this presentation, because when we talk about it later on, there are things that are expected of the tribe and they do have exposures.
- Q. You're talking about on page 12?
 MR. SCHEFF: Don't cut him off. Don't cut him off, please. Let him finish his answer.
 BY MR. ACKELSBERG:
 - Q. Are you talking about page 12?
- 19 A. I'm sorry, I'm on page 2.
 - Q. No, but when you say "later on," that's what --
 - A. So, I'm sorry, within this dec, when we're talking to the tribes, these are expectations that would be set out of what they would need to do to -- and as I mentioned, as you go through the

Page 118

- to go, just needs some configuration and approval of the partner on how they want to set up the program.
- Q. Okay. And just looking at the last paragraph, why don't you read it out loud?
- A. It says, "Using Think Finance" -- "Think Finance technology and services, tribes can generate millions of dollars in cash flow with no investment in technology, lending capital or marketing costs and with no risk of loss."
- Q. And, in fact, that's what -- what Think was offering, right? I mean, this is exactly that, right?
- A. Well, I mean, when I go through this dec and look back at -- we have that -- that paragraph up front, but as the -- as the programs were established, there was a risk of loss created that ended up being as part of the program. So I don't know if that was the best term to use in this presentation. I think, also, if you look back, you know, there are expectations -- I think we look back on slide 12, of different expectations that were needed from the tribe as part of this process to keep the product up and running and to have staff

and things like that. So there is some risk there

Page 120

- negotiation process, in the product struc- -- the program changed or is modified, there is some ownership that the tribes had in -- in each of the programs that were launched.
 - Q. So let's go to -- let's go to page 12. And is that -- you know, the title is "Think Finance & Tribe Partner Roles: Who does what?" So this is -- this is attempting to break out for the potential tribal partner what Think Finance does and what the tribal entity would do, right?
 - A. So this is, you know, a 30,000 foot overview of what would be done, and there's -- I think we even have other presentations that go into more detail of what that expands into, but this is the 30,000 foot level, yes.
 - Q. And so with regard to consumer marketing, Think Finance has the platform, it has the ads, it -- it comes up with the radio, TV, print. It has the search engines. It has the brand development. And the role of the tribe would be to review and approve anything that went out under the name of the tribe, right?
 - A. And make any changes they see necessary.
- Q. Right. Okay. Anything else the tribe would do with regard to marketing?

But I'm just really 6 dealing with the -- the initial -- establishing the 7 relationships the way things were in the beginning. 8 Okay?

- Q. With regard to application processing, well, this -- this relates to the decision engine that we talked about before; am I right?
- A. So, actually, I would say the decision engine piece would be one below. Application processing is --
 - Q. Okay. That's the website?
- A. Yes.
- 18 Q. And Think Finance was telling the tribe: 19 We can -- we'll put together the website for you, 20
- 21 A. So, actually, let me back up just real 22 quick. So, yes, so the application processing piece 23 would be -- you're right. I was getting confused 24 here. It would be on the -- what the tribes wanted

for the look and feel of the site, what kind of

- interesting things about the Chippewa Cree tribe that we felt that they were a good partner for was they actually had an established lending operation already set up through another third-party servicer.
- 5 BY MR. ACKELSBERG:
 - Q. Meaning Encore?
 - A. I believe that was the partner that they had.
 - Q. Well, had they ever made a loan with Encore?
 - A. Have I ever made?
- O. No. Had the tribe ever made a loan with 12 13 Encore?
 - A. It was my understanding that they had an established platform, established site, and a portfolio that was there.
 - Q. That wasn't my question. My question was whether they were actually making loans on that platform?
 - MR. SCHEFF: Object to the form; asked and answered.

You can answer again.

- A. That was my complete understanding.
- 24 BY MR. ACKELSBERG:
 - Q. That you thought they were making loans?

Page 122

- 1 creative, what kind of verbiage they wanted out 2 there, and also any kind of communications with the 3 customer before the application process was 4 completed. 5
 - Q. And then under "Underwriting Criteria," then that's -- that's the decision engine, right?
 - A. So here what would be requested -- required of the tribes would be that they would have to approve up front any kind of underwriting criteria, whether that's knockout rules, score cuts that -that they would set. And then on a go-forward basis any kind of modifications that needed to be made had to be approved and -- reviewed and approved by the tribe, and then there would also be ongoing reporting on how the portfolio performed that they would be expected to -- to review to make sure they understand the portfolio is performing.
 - Q. Now, I mean, when you went to the Chippewa Cree, I mean, they didn't have any -- they didn't have any experience running a loan operation like you were -- like you were -- like you were offering to set up for them, had they?
- 23 MR. GATEWOOD: Objection; form. 24 MR. SCHEFF: Object to the form. 25
 - A. Sure. I mean, actually, one of the

- 2 Q. Okay. And so in terms of the -- the role 3 of the tribe with regard to underwriting, the tribe
- 4 had to -- the tribe had to approve any -- the
- 5 development of the -- the decision engine required
- 6 certain parameters that the tribe would have to --
- 7 would have to agree to, right? They would have to
- 8 approve certain -- whatever the particular
- 9 underwriting criteria were of the platform that was 10 set up, right?
 - A. The tribe would have to approve anything that into the -- the underwriting.
 - Q. Right. So Think Finance would have to develop something in order to -- there would have to then be someone saying: Yes, I approve that. Right? That's -- that's what the tribal role would be, to approve what Think Finance put in front of them, right?

MR. GATEWOOD: Objection; form.

A. My understanding was, and the way it actually took place, was not that they just approve anything that was sent over to them. They -- they would have to review any kind of changes that were being proposed, understand the impacts that it would have to the portfolio. And since they did own a

 - A. -- on anything.
 - Q. And your sense was that the tribe really understood all that and they understood -- when you sent loan criteria, they understood that? I mean, were you involved in that?

MR. GATEWOOD: Objection; form.

A. So most of the -- from a -- an underwriting standpoint, a lot of that conversation came from our risk department with -- with the partners. But I reviewed some of the documentation that was sent -you know, not every documentation but -- but how that structure was put together, and I thought they

- 20 were very thorough on what the -- the changes were
- 21 being proposed for, what the impact would be so that 22 the tribe could really understand what was going on
- 23 and ask the questions they needed to ask to get
- 24 comfortable.

- 5 BY MR. ACKELSBERG:
 - Q. That's -- right?
- 7 A. So I would say you see many lenders out 8 there partner with ad agencies, creative agencies to 9 do marketing for them on behalf of their products.
- 10 And so this is --
 - Q. Understood.
 - A. And so, just -- just as you see as in many other industries, the tribe contracted with telemarketing to do that -- that marketing, but they had to be involved with every piece of communication and creative to make sure it met their criteria.
 - Q. I understand. And they contract with Think Finance to -- to operate the website and decision engine?
 - A. So, I mean, once again, on the website creative, there was -- there was work done with the tribes on how to propose what that look and feel, what that language would be that the tribes had input on. Any kind of verbiage that was out there, it had to be approved upon. And then the same thing

Page 126

Page 128

- Q. What about under "Funding and Payment Processing," that was, basically, all done by Think Finance, wasn't it?
 - MR. GATEWOOD: Objection; form. MR. SCHEFF: Object to the form.
 - A. So under "Funding and Payment Processing," as -- as part of the system, the system would cue up what -- what loans needed to be funded that night, what loans needed to take payments out of.
 - BY MR. ACKELSBERG:
 - Q. Whose system? A. The loan management system that was licensed by the tribe. So based on loans that they had originated, the system would cue up any kind of outgoing credits or incoming debits, but those were -- would all be going into a tribal account that they owned.
 - Q. That would all be managed by Think Finance,
 - A. That was the tribe's product that they were -- I don't understand what you're saying.
 - Q. Well, I'm just trying to understand who's doing what here. So let's go to the top -- from the top. The tribe -- the marketing is done by Think,
- 24 25 but the tribe has to approve it before it goes out,

with the underwriting criteria, as I mentioned earlier, that was something that it was their underwriting criteria, they -- they set that criterion up front when the program was established. Any changes that were proposed, they approved or made modifications to.

And the other thing they had -- they had access to was at the end of the day, the -- the decision engine that underwrote the loans based on their criteria, it would say these are the loans that met your criteria and these are the loans that did not meet your criteria and so it had to be declined, and they had the ability to go in and review any and all of those to audit and sample and make sure it met their criteria.

- Q. Well, they had the ability, but they didn't -- they didn't really have to do it in order for the loans to be either approved or denied, right?
- MR. SCHEFF: Object to the form. MR. GATEWOOD: Objection; form.
- A. So to me, that's -- that's what I would call a belts and suspenders approach. They had already set up the criteria up front. They had already made approvals on any changes that were made

So, yes, so applications go through the 6 6 to scale it. And so as that was first launched and decision engine, and based on their criteria, 7 7 bringing the staff on board and getting them trained 8 8 up, it took -- it took time and effort to partner BY MR. Because they didn't have a call center 11 11 sorted for additional. . . 12 before, right? 12 Q. Right. Okay. So this is part of what 13 A. When we -- when we began working with them 13 the -- the engine does, is it keeps sorting out the 14 14 applications based on various criteria, correct? they had -- what I remember is they had people 15 15 taking calls for their existing portfolio, but it MR. And so the 17 You can answer the question if you can. 18 idea was to help -- help them build something that 18 A. So, yeah, it separated to me one to three 19 19 they could go into that so they could scale much buckets, either to approved, need more information 20 more beyond what they had. 20 21 Q. So let's just talk very briefly about the 21 BY MR. ACKELSBERG: 22 specific role of the call center that was located in 22 Q. Okay. So with the approved bucket, the 23 23 the Chippewa Cree reservation. Am I right that the call center doesn't have to do anything, right? 24 role they played was verifications? 24 A. So this was entirely calls on the front end 11 misstates the testimony. 12 regarding the application process, right? 12 You can answer the question if you can. 13 A. Initially, they took calls on the front end 13 A. Other than the approval they've already 14 on the application process. Over time, as it 14 done to outline the criteria for it to be approved 15 evolved, I believe they were also taking customer 15 and the ability to go in later that day to audit to 16 service calls as well. 16 make sure it meets the criteria, there's nothing 17 17 Q. All right. So let's just -- let's just else that needs to be done. 18 deal with the early period first. So some -- some 18 BY MR. ACKELSBERG: 19 loans are approved automatically. Right? 19 Q. Okay. But then there's the second bucket, 20 MR. SCHEFF: Object to the form. 20 and that's the verification bucket. And with regard 21 BY MR. ACKELSBERG: 21 to the verifications, some portion of the 22 Q. The time is 3:30 p.m. 1 2 2 BY MR. ACKELSBERG: BY MR. ACKELSBERG: 3 Q. Now, on -- now, I am going to represent to 3 Q. During this period of time, or shortly 4 you, Mr. Harvison, that when this document was 4 thereafter, do you remember the executive team 5 5 produced to us, it came with metadata that said you having an initiative that was referred to as 6 were the author and the custodian of this document. 6 "tribalization"? 7 Does it look familiar to you? 7 A. So what I recall is around the fall of 8 8 A. It looks familiar. 2012, we had been partnering with tribal partners 9 9 Q. Okay. And do you recall preparing it? for almost two years now, and I think a term came 10 10 up, tribalization. But the whole -- the whole Q. So if you could turn to page 3 of the --11 11 meaning behind that was we knew that the 12 and this is a PowerPoint? 12 partnerships with the tribes would be an evolution. 13 A. That's correct. 13 So what was established on day one, that would 14 O. And who would have been the audience for 14 continue to evolve, and they would take more and 15 this PowerPoint? 15 more ownership and responsibilities and build out 16 A. So this here, I'm not sure if this was just 16 their internal staffs and their -- their control and 17 17 shared internally or -- I believe this was just capabilities. 18 shared internally. 18 And so as you get to the fall of 2012, 19 Q. "Internally," meaning the executive team? 19 it's -- it's become a very sizable business for Think Finance. And so this is a point where we're 20 A. I believe so. 20 21 Q. Or the products team or what? 21 trying to look at, you know, how do you make sure 22 A. It would have been the executive team and 22 that is this the strongest model possible. 23 23 some of the product teams. Q. And one of the things you wanted to do was 24 24 Q. Okay. And I want to focus on -- so the to improve the optics as well, right?

I think, as I mentioned already in the 13 13 creator of this document, I was taking pages from conversation, that when these businesses start to 14 14 other documents and then created it and put it in scale to the size that they have, I think it's --15 there to share with the team. 15 it's an understanding that there's going to be 16 BY MR. That -- that looks correct. 12 A. That's correct, nothing ever came of it. 13 BY MR. ACKELSBERG: 13 Q. Now, was this your idea or Bret's idea? 14 14 Q. Okay. Now, Yessio is another company. A. I think this probably came -- actually, I 15 don't remember who came up with this idea. Might 15 That's Bret Horrocks' company, isn't it? 16 A. So explain to me the difference between the 18 tribal involvement in the business? 19 19 services provided for the company we talked A. Yeah, as I mentioned earlier, this -- this 20 20 previously about, SourceItOne, and this company was a thought of could you have another tribal 21 21 venture, for instance, having the collections being called Yessio. 22 A. Sure. SourceItOne was more of a consulting 22 done by a tribal entity. 23 23 company to help with, as I mentioned earlier, Q. So -- and as you're describing the deal, 24 identifying potential debt buyers, how to optimize, 24 the basics of the deal in the e-mail -- so first of 25 make suggestions on collection strategies, and 25 all, when you -- when SIO is mentioned, that's Page 258 Page 260 potentially find other third-party collectors to 1 SourceItOne, right? 1 2 2 collect on behalf of the lenders. So the Ho Chunk tribe would buy 4 4 started this up to be an actual collection service Yessio from Bret Horrocks for a nominal amount. 5 5 organization so they would actually have collectors That was Step 1, right? 6 6 in-house doing the collections themselves. A. That's correct. 7 Q. All right. Let me show you one other 7 Q. Okay. Step 2, Yessio would sign a 8 document with regard to Yessio and yourself. 8 management contract with SIO, Bret's other company, 9 9 (Exhibit No. 154 marked.) to actually do the work, right? 10 10 A. When you say "work"... MR. SCHEFF: What's this one? Q. Well, the idea here was that -- was that 11 MR. ACKELSBERG: 154. 11 12 BY MR. Responsible for making sure that cash balances the system that goes in and out every day. Q. And that includes the ACH the ACH activity as well as the activity of the various bank accounts that you're you're managing, correct? MR. SHELDON: Object to form. At various times today, Ms. Callnin, I may object. And unless I instruct you not to answer THE WITNESS: Okay. MR. SHELDON: please do answer, and you you can ignore my objections. MR. ACKELSBERG: I appreciate it. Thank you. A. Yeah, for for accounts that are within the program, yes.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	A. The invoicing was not in my area. Q. Now but it's something that you understand how the how the process works, though? A. I have I have limited knowledge of the process, yes. Q. Okay. And and is that also true of of the of the payments to GPLS, that you have knowledge, some knowledge, limited knowledge, but you're not immediately responsible for that? MR. SHELDON: Object to form. A. I have limited knowledge of that process. BY MR. ACKELSBERG: Q. And that's but that goes on within the Think finance department? A. Yes, it does. Q. And what about the invoicing and paying the revenue share payments to the tribal entities? A. I have limited knowledge of that, yes. Q. Okay. But that also goes on within A. Yes, it does. Q the finance department? Okay. MR. SHELDON: Linda, just make sure you wait for Mr. Ackelsberg to finish asking his

Page 25 Page 27 1 I've forgotten the first 22. Don't worry about the 1 Q. So you see under TC Loan Service a company 2 numbers. The numbers are just what the numbers are. 2 called Tailwind Marketing. You see that, right? 3 Okay? 3 A. Yes, sir. 4 4 Q. And is Tailwind a -- a subsidiary that you MR. SHELDON: And don't think you're 5 5 going to have to look at the first 22, necessarily. are familiar with? 6 6 BY MR. ACKELSBERG: A. I have limited knowledge of Tailwind 7 7 O. In fact, I'll promise you that you won't Marketing. 8 have to look at those -- all those 22. 8 Q. And what is your knowledge of Tailwind? 9 (Exhibit No. 23 marked.) 9 A. That it is a servicing entity that did --10 MR. SHELDON: Irv, am I correct that 10 that provided marketing services. Q. Okay. And the first -- let's say, in the 11 if you pulled a document from its native state and 11 12 printed it off for this deposition, that you would 12 middle, there's a company called TC Decision 13 have put "Confidential" on it if it was produced 13 Sciences. Is this also a company that you're 14 14 subject to the confidential designation? familiar with from the ledger? 15 15 MR. ACKELSBERG: Yes. So what I --A. Yes. 16 what I did, for every -- I'm better organized than I 16 O. And what is TC Decision Sciences, to the 17 was at the Wilksteen deposition. And so what I've 17 best of your knowledge? 18 done is, for every time that I'm using a native, I 18 A. A servicing company that provided decision 19 19 start off with the page that you'd see that -- that sciences to clients. 20 just says "spreadsheet" or -- and then it has the TF 20 Q. What does that mean, "decision sciences"? 21 PA number and "Confidential" on it. You'll see it 21 A. Meaning there are people that provide risk 22 when we get to the first one. But this isn't one of 22 analysis and that kind of service, you know -- it's 23 those. So. . . 23 hard to explain. So if you are going to market to 24 MR. SHELDON: Thank you. 24 customers, you are going to market to certain 25 MR. ACKELSBERG: Yeah. 25 segments of customers, and some customers are more Page 26 Page 28 1 BY MR. ACKELSBERG: 1 risky than others. These people -- or that entity 2 2 Q. All right. So let me also explain provided that service. 3 something to you that -- as you probably know, 3 Q. And -- and would that include deciding --4 4 before this deposition, there's been a lot of people applying for a loan, deciding who to -- who 5 5 documents exchanged. And the documents that came to approve and who not to approve, as best as you 6 6 from Think Finance are designated "TF PA." Okay? know? 7 And you'll see in the lower right-hand corner -- you 7 A. As best as I know, yes. 8 see that? So we're looking at a document that we've 8 Q. Okay. And what about TC Administrative 9 marked today as 23, Plaintiff's Exhibit 23, but also 9 Services, is that also a subsidiary that you're 10 10 familiar with from the standpoint of doing the has another identifying mark at the bottom, a Bates 11 number of TF-PA-228224. Do you see that? 11 ledgers? 12 12 A. Uh-huh, yes, sir. A. Yes, that would have been the entity 13 Q. So I'm showing you a document that Think 13 that provided administrative services to clients. 14 Finance produced to us. Okay? And I'm going to ask 14 Q. Like who? Who is the client that TC 15 you to look at this and -- and tell me what you see 15 Administrative Services provided services to? 16 16 here. A. That would be likely the -- our partners 17 17 A. In my world, legal entities. that we have, I would say, agreements with, being 18 Q. Okay. And are these entities that are part 18 Plain Green, Mobiloans, Great Plains. 19 of the Think Finance company? 19 Q. And what about Victory Park? 20 A. I know that the -- they are part of the 20 A. I do not know --21 general ledger, which is my world. 21 Q. Okay. 22 Q. Okay. And so do you -- and do you 22 A. -- if TC Administrative had an agreement. 23 recognize all of these companies as part of the 23 Q. Okay. Now, these companies that we've 24 24 general ledger of Think Finance, Incorporated? mentioned -- well, let me ask another one first.

1	Do you know?	1	A. Not not that I'm aware of.
2	MR. SHELDON: Object to form.	2	Q. Okay. So basically well, why don't
3	BY MR. ACKELSBERG:	3	why don't you let's take a point in time. Let's
4	Q. What's that subsidiary what's that	4	say well, let me ask you this: Was there a point
5	subsidiary of Think Finance do, as far as you know?	5	in time between 2007 and now that you can identify
6	A. I have very limited knowledge of that other	6	as the point where Think Finance had the biggest

9	Q. Okay. Now, does does Tailwind Marketing	9	Q. Okay. Sure.
10	have its own employees?	10	A. I
11	A. No, it does not.	11	Q. So so you said in 2007, when they
12	Q. Does TF TC Decision Sciences, does that	12	when you arrived, there were a hundred to 200
13	have its own employees?	13	employees, right?
14	A. Not that I'm aware of.	14	A. Yes.
15	Q. TC Administrative Services, does it have	15	Q. How many are there now, in 2018?
16	its own employees?	16	A. 2018? Less than a hundred.
17	A. Not that I'm	17	Q. Less than a hundred. Okay. So was there a
18	Q. Do any of these companies that we've talked	18	point in time where there were more than 200?
19	about have their own employees?	19	A. I believe so.
20	MR. SHELDON: Object to form.	20	Q. Would it would it be, like, roughly 2013
21	A. I believe TC Loan Services had employees.	21	or so?
22	BY MR. ACKELSBERG:	22	MR. SHELDON: Object to form.
23	Q. And who would those employees be? Do you	23	BY MR. ACKELSBERG:
24	know?	24	Q. Would that sound about right?
25	A. Employees of Think Finance.	25	A. That could possibly be.
	Page 30		Page 32
1	Q. Pardon?	1	Q. Okay. At that point, when it was the
2	A. Employees of Think Finance.	2	biggest, and let's say around 2013 or but the
3	Q. Okay. So so when you got a paycheck,	3	date isn't so much it's not so important as the

Q. Ms. Callnin, before we get to the next -next exhibit, we spent a lot of time on the monthly invoicing and reconciliation that -- that -- that you were involved in, but I want to go back just for a second to the daily reconciliations that -- the daily settlement work that -- that you were responsible for. And I think we -- I think we talked at the beginning of the deposition about the funding process, but I don't -- I want to focus on the collection side and just ask you what the daily reconciliation process consists of on the collection side.

A. The ACH file that was produced by the loan management system for collecting payments would be

Page 119

- 1 in time are something that you prepare and do. So 2
 - it could be -- if you're talking about the daily
- 3 participation transfer of cash receipts of -- you
- 4 know, cash received over to GPLS, that's something
- 5 that you every morning bring up the checking
- 6 account, see what was remitted, and then -- and then
- 7 the transfer to GPLS was done. If it was the
- 8 funding for the ACH, that is something that you
- 9 forecast the fundings for the day, prepare the wire,
- 10 and then send that off to be approved -- both off to 11
 - be approved by the tribes or whoever the approver was

Q. And so -- and so we're talking about, for example, the wire representing the 99 percent share that goes to GPLS, right?

MR. SHELDON: Object to form.

17 BY MR. ACKELSBERG:

- Q. Am I right?
- 19 A. Well, I gave you two. So which one do you 20 want to ask? I gave -- you know, there's the systemic side, the ACH processor doing its thing,
- 21 22 and moving money back and forth. And then there's
- 23 doing the collections transfer to GPLS or the 24 funding transfer over to --
 - Q. Well, let's talk about the collections

Page 118

sent to the ACH pro- -- would be sent to the ACH processor. We would -- the ACH processors would have a reporting system or a portal or something where we could go view to see that they accepted it and it was the same amount that was posting as payments on the customer's system.

We would then -- when they -- the ACH processors were done with their hold period, those funds were then remitted back to the collection account, and we would record the ledger entries.

- O. And so there's -- there's something called reconciliation, and then there's -- and there's also, then, the wire preparations, right? Those are two separate activities that occur, right?
 - A. They're very different, yes.
- Q. Yeah. So which comes first? Can you sort of explain how it works in -- in terms of order?
- A. Wire activities are -- okay. ACH and reconciliation and validating the collections and the funding are all systemic. Okay. Those ACH files and everything are all systemic in passing through. So we don't touch anything. We don't do anything. We just validate the numbers from the -from the ACH processor and from the system.

The wire transfer activities at any point

transfer to GPLS.

MR. SHAPIRO: I'm sorry, we -- you're stepping on the end of her testimony a little bit.

MR. ACKELSBERG: Oh, I'm sorry.

MR. SHELDON: We're not getting -you -- the witness just said "collection transfer to GPLS or the funding transfer over to."

8 A. To the tribes. The tribe -- you know, 9 letting them know what to send to the ACH processor. 10 BY MR. ACKELSBERG:

- Q. When -- when you say "letting them know what to send," you've got me confused.
- A. That's the funding account. Right? We would forecast the funding file. It had to be at the processor. The processor had to have the cash for the file that they were going to receive that
- Q. What confused me was -- was, I think your pronoun "them." I think you're referring to the tribes?
- 21 A. Yeah.
 - Q. You need to -- you told us before that you need to get approvals from the tribes, right?
 - A. Yes, they have to -- they have to --
 - Q. But the actual work of actually doing the

They're objecting to my question. What 19 19 A. It's Rogenski. you need to understand is that unless your lawyer 20 Q. Rogenski. Okay. 20 directs you not to answer that specific question, 21 I introduced myself to you before. I'm 21 you still have to answer the question, even though 22 Irv Ackelsberg, and I'm with -- representing the 22 lawyers have objected. Okay? 23 23 Commonwealth of Pennsylvania. And you understand A. Okay. 24 this is litigation against your former employer, 24 Q. All right. So the court reporter is going 25 Think Finance? 25 to be typing -- well, not just my questions, not Page 10 Page 12 A. Yes. 1 1 just your answers, but all the objections. 2 2 Q. Okay. And various other -- other Everything that happens here on the record is going 3 defendants. 3 to be recorded, and that's the official -- the 4 4 Ms. Rogenski, have you ever been deposed official transcript. Okay? 5 5 before? A. Okay. 6 6 A. One time. Q. And because the written transcript, rather 7 Q. Okay. And was that in a personal matter or 7 than the videotape that -- that is being prepared, 8 related to your job? 8 is going to be the official record, we really need 9 A. Personal matter. 9 you to -- to give us verbal responses to all the 10 10 Q. Okay. And what kind of a case was that? questions. So nods or shakes or shrugs, those 11 A. A car accident. 11 things don't get -- make -- that's hard for the Q. Okay. So you might have some -- how long 12 court reporter to -- to record. So there may be a 12 13 ago was that? 13 moment when I say, "Is that a yes?" And, you know, 14 A. It was in my early 20s. 14 it -- please forgive me. It's not intended to be 15 15 disrespectful. It's just that we need -- we need Q. Okay. 16 16 A. So a long time ago. verbal responses to everything. Okay? 17 17 Q. So -- okay. So -- so I'm sure your lawyer A. Okay. 18 18 Q. Alrighty. Another sort of ground rule is has gone over, like, how this all works, and you've 19 19 that if you don't understand my question, it's got a -- a feel already for how this is going to 20 happen, but just to clarify that you do understand 20 perfectly fine to say, "I don't understand the 21 what's going on here, I need to just run through a 21 question," and then I'll try to rephrase it. If you 22 few preliminaries. 22 don't know the answer to the question, you can --23 23 that's perfectly fine too. You can just tell me, "I And the first is -- is just to confirm 24 24 with you that the way this -- the way this don't know the answer to that." 25 25 proceeding works is that it's a series of questions Now, the -- the whole thing here is just --

A. This is -- this is Linda's view, me, okay, of how things kind of should work business-wise. This isn't how they necessarily are expected to run their business, but this is just me looking at cash and trying to give the tribe an overview of my thought process of how and where the money was rolling through and from and to.

So in this case, I said if, in the case of the prior diagram, funds were provided to Plain Green tribe from Haynes Trust -- and that's the example in this -- in this original one. So they -they fund the loans of 2 million -- \$2,000. GPL comes in and buy -- GPLS comes in and buys the participation for 99. So the Plain -- Plain Green tribe now, two days later, is out their \$20 for that initial funding of those loans.

If they get collections in -- the next column is -- next section is a collection example. If they get collections in of \$2 million on the principal, and they've got collection -- and they have to give that principal back to GPLS for their participation that they're going to get their money back for. And then Plain Green ended -- ends up

Page 95

- from the standpoint of the reporting that you're doing to Plain Green, you -- that's not something that -- that you would report to them, that's -that's between them and Mr. Haynes, right?
- A. That's correct.
- Q. And -- and you're just trying to be helpful and to -- to tell them: Don't assume that this 1 percent is really all just -- is cash that can be spent. As a -- from a business standpoint, you have to take account for the liability that you also

MR. SCHEFF: Object to the form.

A. That -- that was my -- that was my -- what I was trying to convey.

BY MR. ACKELSBERG:

Q. And I -- I take some -- maybe I'm -- I'm reading too much into your answer, but did you have some degree of frustration with the business sense that -- that you were seeing from the Plain Green

MR. SCHEFF: Object to the form.

A. No. I think that where I was at is that I live in the weeds. Both -- Billi Anne was the one -one of the people here, and I think Bobbi was new. So Billi Anne was trying to make sure Bobbi

Page 94

with \$20 of principal returned.

Then the next line goes into the collection. So if interest is collected on the loan of 3,000, GPLS Servicing gets their 99 percent, and Plain Green retains their 1 percent. So \$30 of that.

So my thought process to them was to make sure they were thinking about the fact that they had a loan outstanding to -- to Haynes Capital, and that realistically, they needed to look at -- I mean, they needed to be looking at their business from a perspective of where are the funds going to come from for them to pay back their loan and what are they ultimately going to have left over at the end of the day. And that's what the bottom section is trying to explain to them.

Q. Because -- and let me -- let me make sure I understand what you're saying. So -- so the money that -- that reflects their 1 percent -- their 1 percent interest in the -- in the loans made, out of that, they still have to somehow pay -- pay back Haynes?

A. Right, they have a liability on their

Q. Okay. And -- and you're not -- you're not --

Page 96

- understood it. But this was me trying to give them a little taste of the weeds so that they would understand when we're sending them stuff, you know, where our brains are coming from. Billi Anne
- 5 obviously was, you know, a 50,000 view, and people 6
 - that do the financials are in the weeds.
 - BY MR. ACKELSBERG:
- 8 Q. At this point in time, in 2012, was 9 there -- do you recall, was there anyone at -- at 10 Plain Green who was doing financials for them?
 - A. I don't know who was doing their financials. I -- I know they were preparing something, but I didn't ever see it. I provided to them their -- the program financial piece that we had insight to, and they would incorporate that with their own financials.
 - Q. Did the other tribal structures -- and I'm referring to Great Plains Lending and Mobiloans. Did they work in a similar fashion?

MR. SCHEFF: Object to the form.

A. No, they did not. BY MR. ACKELSBERG:

Q. Okay. So let's start with Great Plains Lending, and tell me how that one differed.

A. Great Plains, I -- and I'm not going to

remember all the specific details, but both Great Plains Lending and Mobiloans had built into their agreements a deposit reserve concept. And I can't tell you the specifics without going and looking at the agreements.

Q. Okay. And so if we were -- if -- if you had prepared a chart, the equivalent chart, equivalent spreadsheet, a high level discussion and a cash flow diagram for -- for Great Plains Lending or Mobiloans, you would need to have taken account for the reserve requirement?

A. Yes.

Q. Okay. And -- and I assume that Mr. Haynes was not an intermediary for the -- the initial funding capital on -- for the other two tribal entities?

MR. SHAPIRO: Object to form. MR. SCHEFF: Object to the form.

A. Not -- to my knowledge, he wasn't involved n any of it.

BY MR. ACKELSBERG:

- Q. Do you know where the initial funding capital came for Great Plains Lending?
- A. Part of the deposit reserve.
 - Q. Okay. And what about the other part?

Page 99

- A. Yes. Their -- and their depo- -- I remember their deposit reserve sections were different in the calculations, but I don't remember why -- how or why they were different.
- Q. Okay. So -- so let me make sure I got this straight. With regard to Plain Green, the 1 percent funding capital was coming from the money that they got from Haynes, that Haynes got from Think Finance?
- A. I would assume, yes. I mean, I don't know what else Haynes had access to funds for or whether he got money from other people than Think Finance, cash fungibles. So -- the amounts we moved to them, they moved. So I would say yes.
- Q. Right. So just -- so to be clear, I mean, you had access to the Haynes account, as well, for Plain Green; am I right?

A. Yes.

- Q. So -- so it was actually the Think Finance
 finance staff that would move money, with regard to
 Plain Green, from a Think Finance account to a
- Haynes account to a Plain Green account?

 A. As admin agent, yes.
 Q. With regard to Great Plains Lending and Mobiloans, some portion of that 1 percent was

actually a transfer from GPLS to the respective

Page 98

A. I mean, that -- I don't know -- I don't know where -- I don't know what or how they handle their funding. I just saw the piece that came from the deposit reserve.

Q. And -- and was the deposit reserve something that was managed by the Think Finance staff, the Think Finance finance department?

MR. SHELDON: Object to form.

A. We did analyses related to it.

10 BY MR. ACKELSBERG:

Q. And did the -- and did you also do fund transfers -- or were you involved in the fund transfers in order to maintain that reserve requirement?

A. We would have been involved in the initiation of setting up wires related to that.

Q. Okay. Which would then have to be approved by the tribe?

A. Well, no. That would be -- the ones we were involved in would have been approved by GPLS.

Q. Oh, okay. So were the -- were the reserves being provided by GPLS?

A. As part of the document, yes.

Q. Okay. So -- and this is true of both GreatPlains Lending and Mobiloans?

Page 100

tribal entity?

A. As a deposit reserve.

Q. So that's "yes," right?

A. Well, I mean, it's -- was transferred as a deposit reserve. The overall intent of the deposit reserve was due to the fact that GPLS had a right to stop buying participations at any point in time, and they would buy them two days out.

So the calculations were designed to ensure that if the tribe had made loans, that they would have the money to buy -- to cover the participations for the two days, and then they would -- they either stopped lending or find some other source of participations if they needed -- if hey wanted to do more loans.

So it was by design to make sure that everybody had their rights in place.

- Q. We were -- the -- the exhibit that -- the Plain Green exhibit we were looking at with the e-mail was from November 2012. At this point in time, were you still reporting to Angela?
- A. I don't know. Angela left somewhere in there, and I -- I'm bad with dates.
- Q. Okay. So when Angela left, who was your direct re- -- who did you report to?

- Q. Okay. So what was the extent of Great Plains Lending's ability to move money in and out of the funding or collections account by themselves without Think Finance?
- A. They were their accounts. They could move anything they wanted to move.
- Q. Your previous answer said, though, that they wouldn't have -- they wouldn't have done anything on their own with regard to transfers to GPLS.
- A. Not to my knowledge, because we always coordinated that with them. Gave them the amounts, and they would confirm them and then do the wires.
- Q. Okay. So you were involved in some fashion at least with regard -- "you," I mean the Think Finance finance people -- were involved in any -- in any wire transfer that involved GPLS?
 - A. Yes.

- Q. What about with Mobiloans?
- A. Mobiloans, at different points in time, it was different. The ultimate, I think, ending position was that we would set up the wires, notify them, and they would release them.
 - Q. Okay. And you mentioned that the other two tribal entities other than Plain Green did not --

Page 131

- Q. Were there situations where the Think Finance finance people were waiting to get the attention of the tribe to release, and it took a while for that to happen?
- A. Yes.
 - Q. Okay. How often did that happen?
 - A. I can't even give you a percentage. It was just occasionally.
- Q. Were there -- as between the three tribes, were -- were there -- was there a tribe that was -- I'm not sure what word to use -- delinquent or -- or difficult for the -- for the Think Finance people in terms of getting -- getting the proper release?
- A. I would say Plain Green, because they had -- you know, they were in a remote location and had weather issues and things at times.
- Q. So what would happen if -- let's say -- now, did you -- did you need -- let's say you want to make -- it's Plain Green, and there's money sitting in the collections account, and you want to transfer the 99 percent to GPLS. Right? And that's at Citibank, right?
- A. Yes.
- Q. So were there -- so I want to be clear in what -- what kind of a situation we're talking

- their accounts were not in -- in Wells Fargo, right?
- 2 A. Correct.
- Q. Did -- well, did the banks that the other tribes use have an administrative portal similar to Wells' CEO function?
 - A. I am -- I do not know.
 - Q. Okay. Because that was more on the treasury side?
 - A. No. Just because we had the -- we had the CEO portal -- being Think Finance owned the CEO portal relationship with Wells Fargo, and we brought the Plain Green tribes in under our umbrella for ease of administration. And the other two tribes had their own banks, and I don't know how they had their stuff set up. They added us to have access to view and access to set up wires.
 - O. Okav.
- A. "Us" meaning various people on the Think Finance team.
- Q. What would -- were there ever a circumstance where -- that you know, where Think
- Finance set up a wire, and -- and the tribal entity did not release?
 - A. I can't remember a specific time. That's not to say it never happened.

- BY MR. ACKELSBERG:
 - Q. Okay. And so what was the procedure for -you know, in the situation where -- was there a way that the wire could be released without the tribe giving the okay?
 - A. I'm sure there were occasions where the wire was released prior to receiving okay from the tribe when the wire cutoff time was approaching or going to pass. Generally, if they couldn't release their wires, they would, in e-mail, tell us -- or in phone call, tell us, "It's okay. Go ahead and release that for us. We can't get into the office."
 - Q. Okay. And -- and were there times you couldn't even get the e-mail back, and that you just had to get -- had to get the wire to GPLS on your

Q. But we do appreciate your time, and we'll try to use it productively.

It would help me to know if you've been deposed before.

- A. No, I have not.
- Q. Never. Okay. So let me go over some ground rules that will help explain what's going on here. I'll be asking you questions throughout the day. Occasionally, I'll be showing you documents, but it's mostly a question-and-answer session.

It's all being taken down by -- by Christy, the court reporter, and she's creating the official transcript. What is written is the official transcript.

We also have it videotaped. So your answers are being videotaped. Because of that, it's really important that you respond out loud to my questions. You and I may be able to understand shrugs of the shoulders or -- or rolls of the eyes or --

A. Right.

1 least I hope not. I will try to move efficiently.

- If you need a break at any time for any reason,
- 2 3 that's fine, just let us know. We'll be taking
- 4 one -- we'll be taking breaks on our own initiative,

Page 11

- 5 but if you need one, I'm happy to take it. The only
- 6 thing I'd ask you to do, though, is answer any
- 7 pending questions before you take your break.
- 8 You're also free to consult with your counsel, but I 9 would ask you to answer the question before you do

From my perspective, although perhaps not

12 Mr. Scheff's, this works best if this is a

13 conversation. And for that reason, I am -- I am

14 interested in your truthful answers to the questions

15 that I've asked. And it's my obligation to ask you

16 the questions, and for you to let me know if you

17 don't understand the questions. It often will occur

18 that there's something about my question that you're 19 not understanding. It may be because I don't

20 understand what I'm asking, or I don't understand

21 fully what I'm asking. If you care to volunteer to

22 help me keep my question on track or to fill in the

23 blanks, I would appreciate it. It helps things go

24 more smoothly.

Is there any reason today that you -- you

Page 10

Q. -- head movements, but the court reporter needs to hear your response.

Because we're trying to create a record, the easiest thing to do is for us to try to discipline ourselves; that I will try and state my question fully and completely, and if you'll let me get that out before you respond, that will be very helpful. In turn -- and this will be harder -- I will try and let you finish your answer before I ask the next question.

One wrinkle is that your counsel or one of the other counsel right here may object to my question. In very limited circumstances where you're instructed directly not to answer the question, you are obligated to answer my question despite the objections. So it usually works well if I ask the question, and you give your counsel time to object or one of the other lawyers time to object before responding. If we try to keep -- avoid talking over one another, that will help make the record clear. Is that -- is that acceptable?

A. Understood.

24 25

Q. Good. Good. It's not a -- we will be here quite a while. I don't think we'll be here all day. At Page 12
